

Puget Sound Data Systems, Inc. (PSDS)

PSDS is a company unlike any other. It's a fact underscored by our reach across consumer, small and medium-size business (SMB) and enterprise customer segment. We are focused on helping people apply technology in meaningful ways to their businesses, and communities and around the world. Our strategy is to offer products, services and solutions that are high tech, low cost and deliver the best customer experience.

PSDS is a privately held Washington corporation located in Woodinville, Washington, approximately 20 minutes northeast of Seattle. Since 1986, **PSDS** has been providing world-class enterprise computing solutions to the government, universities, Fortune 500 companies, and other small to medium-size businesses. Specializing in complex computing needs, **PSDS** supplies complete data center solutions, including enterprise-class servers (Linux, Unix, Windows, and OpenVMS), disk storage, tape sub-systems, networking hardware and services

PSDS is a major systems integrator and cluster builder in the Northwest, our goal at **PSDS**, is to provide our clients with an unbiased, consultative approach to a suite of hardware, software and services to resolve multi-platform connectivity issues in enterprise environments. These services take the customer from assessment, through logical and physical design, into installation and testing, to ensure a systematic analysis of the customer's actual needs and requirements so that business and technical goals are achieved.

PSDS specializes in business continuity solutions and disaster recovery analysis and planning. Data protection and high-availability are key areas of expertise, with systems engineers and analysts averaging 20 years of experience.

Additional core competencies for **PSDS** are in planning, configuring and deployment of SAN/NAS technology, and disaster recovery solutions

PSDS can provide onsite and offsite customer support coverage for your HP/Compaq, Alpha & VAX - workstations, servers, storage systems, and more. Competitively priced we let you select service levels, hours of coverage, and response times to suit your business and technology requirements.

If you organization is looking for hard to find i.e.: older systems, networking, or storage products give us a call. If you are looking for older VAX's, Alpha's, RS6000's, AS400's, Sun, HP or any system storage products EMC, STK, StorageWorks.

PSDS is also a great source for you to purchase computer equipment (new or used), whether it is IBM, HP/Compaq, Sun, CISCO, EMC, Hitachi, Dell, Cisco, Nortel or????? Yes, we do a lot of buying and selling used/refurbished equipment. But much of what we deal in is new, too, especially disk drives "new in the box," and/or processors that may be one step behind current manufacturer offerings. In all cases your savings will be significant without compromising quality.
